

**Welcome letter from the
Chairwoman of the Management
Board of Association of Wind and
Solar Power Plants of Kyrgyzstan
Kyrbasheva K. B.**

Dear colleagues, participants and guests!

We are glad to welcome you at the 12th “EnergyExpo Kyrgyzstan” International Specialized Exhibition of Energy and Lighting.

The modernization of energy serves as the flagship of the development of the domestic economy having a multiplicative effect on the functioning of such areas as construction, industry, transport, housing and communal services etc. An important direction in strengthening the energy potential of the Kyrgyz Republic is the commissioning of renewable energy sources, including wind and solar power plants. Being rich in natural resources, Kyrgyzstan has a huge potential in the implementation of projects aimed at the introduction of renewable energy, the distinctive feature of which is their accessibility and environmental friendliness.

The holding of the specialized “EnergyExpo Kyrgyzstan” Exhibition of Energy and Lighting is an indicator of the high level of innovative development of the republic and technologies used by the main market participants. The exposition allows you to demonstrate modern achievements and new technologies to a wide audience, discuss topical energy issues with leading experts of the sector.

I am sure that the exhibition will contribute to increasing innovation and investment activity in the industry and will provide a unique opportunity to exchange experience, establish interregional and international contacts, as well as to outline a roadmap for future joint projects in the field of energy.

I wish successful work, conclusion of mutually beneficial contracts and productive business meetings to the organizers, participants and guests of “EnergyExpo Kyrgyzstan”!

**Chairwoman of the Management Board
of Association of Wind and Solar Power Plants
of Kyrgyzstan**

Kyrbasheva Kundus Bergenshaevna
